Celebrating **Diversity**

in Innovation

For over a decade, The Color of Science™ Program has highlighted the amazing contributions to science, technology, engineering, art, and math (STEAM) made by women and persons of color. This

"Passport to the Color of Science" showcases the genius, creativity and commitment to the scientific enterprise of just some of these great women and men. We hope you enjoy reading these short biographies of some of the brilliant minds that help make our world a better place and enhance our own living experience.

Dr. Frederic Bertlev COSI's President and CEO, and the founder of The Color of Science Program

Nikola Tesla

Engineer and Inventor

Nikola Tesla was horn in the Austrian Empire in 1856 and moved to the United States in 1884 He had over 300 patents and inventions. This includes alternating current (AC). AC is the type of current that comes from wall outlets today. COSI's Electricity stage show explores some of these topics!

Josephine Cochrane Inventor

Josephine Cochrane was born in Ohio in 1839 She invented the dishwashing machine. It used water pressure to help clean the dishes. She founded the Crescent Washing Machine Company, Today, they sell dishwashers under the brand name KitchenAid

Image Credit: USPTO

Cool Fact:

Nikola Tesla was the inspiration behind Tesla, Inc. The energy company is known for many products like electric vehicles!

Cool Fact:

In 2013, Josephine Cochrane's face was added to a postage stamp in Romania for World Intellectual Property Day.

Ruth Graves Wakefield

Dietitian and Chef

Ruth and her husband Kenneth ran a small inn called the Toll House Inn. Ruth was in charge of the inn's menu, which became well known for its desserts. One day, Ruth tried something new. She broke pieces of

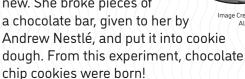

Image Credit: INTERFOTO / Alamy Stock Photo

Cool Fact:

The Nestlé company bought the rights to Ruth Graves Wakefield's cookie recipe for \$1. In return, they gave her unlimited chocolate for her baking!

Granville Woods

Engineer and Inventor

Image Credit: Cosmopolitan Magazine Cover, 1895

Granville Woods was born in Columbus, Ohio in 1856. He was a mechanical and electrical engineer who worked on communication equipment. He invented a way for trains to talk with dispatchers and other trains

while moving. One of his inventions is the basis for the 'third rail' of modern electric train systems.

Did you know?

Granville Woods earned over 60 patents as an inventor!

Temple Grandin, Ph.D

Professor, Inventor and Advocate

Dr. Temple Grandin is a professor of Animal Sciences. Her research on animal

behavior has helped us treat livestock, like cows, better.
Dr. Grandin designed meat processing facilities that reduce stress for the animals. Dr. Grandin also advocates for Neurodivergent people and is on the Autism Spectrum.

Did you know?

Dr. Grandin invented a hug machine that squeezes the user for stress relief. It is modeled after squeeze chutes used for cattle.

Lynn Conway

Engineer and Inventor

Lynn Conway invented
Dynamic Instruction
Scheduling (DIS), which
made computers work
faster. In 2020, she
received the Lifetime
Achievement Award from
the IBM Corporation. Lynn w

Achievement Award from the IBM Corporation. Lynn was a transgender woman who advocated for rights for transgender people.

Did you know?

Conway holds 5 U.S. Patents and is in the National Inventors Hall of Fame.

6/

Dana Bolles

Engineer and Advocate

Dana Bolles is an External Information Technology Lead for NASA. Part of her job

is to run the science.nasa.gov website! She has worked at NASA since 1995 in a lot of different jobs. Dana is an advocate for people with disabilities in the STEM field. She was born without arms or legs.

Image Credit: NASA/Aubrey Gemignani

Cool Fact:

Dana Bolles is an ambassador for AstroAccess. AstroAccess studies tools that will help people with disabilities in space exploration.

Nainoa Thompson

Navigator

(Charles) Nainoa Thompson is a Native Hawaiian navigator and voyager. He traveled from Hawaii to Polynesia without modern navigation technology. He sailed using methods that were used in the 14th century

Image Credit: DVIDS

(the 1300's)! He is the first person to use those methods in more than 500 years. Nainoa invented the modern star compass.

Cool Fact:

The star compass isn't a physical compass. It is a technique that uses the horizon and stars to navigate while on the ocean.
