COSI CENTER FOR SCHOOL & COMMUNITY PARTNERSHIPS

Your Partner in Education
Your Resource for Experiential Learning

COSI is an integral part of our learning ecosystem, which includes in-school, at-home, and community-based education. The COSI Center for School and Community Partnerships was established to enrich this ecosystem by inspiring interest in STEM and creating learning progressions for young people that connect and deepen STEM experiences over time. The Center offers a rich array of curriculum enhancing programs, connections with STEM content and partners, and COSI’s unique informal education expertise gained through 50+ years of passion for student success.

Each education program offered through the Center is designed to align with standards and connect to your learning objectives. As your partner in education, the Center assists in combining programs for customized experiences to best support your goals. Packages are offered for all grade levels and include a wide range of science topics. The Center features educators who are dedicated to creating experiences that spark curiosity in learners of all ages.
The Experience at COSI

21ST CENTURY LEARNING LABS
These structured field trips nurture scientific inquiry through connection to COSI exhibits and a combination of COSI experiences for in-depth exploration of compelling STEM topics.

HOMESCHOOL WORKSHOPS
Homeschool Workshops offer a new depth of hands-on science experiences for educators and learners to better understand real and relevant science concepts.

PROFESSIONAL DEVELOPMENT
The Center offers continuing education workshops led by expert informal STEM educators on topics ranging from the new Ohio science content standards to incorporating project- and design-based learning into your curriculum.

TEEN TECH STUDIO
Our state-of-the-art digital learning lab gives students the chance to explore technology through mentor-guided multimedia activities, including audio/video production, 3D modeling/printing, digital art, coding, animation, and video game design.
INTERACTIVE VIDEOCONFERENCES
Connect students with scientists, doctors, and experts in their fields through a LIVE, two-way video experience that immerses viewers in real science—in real time.

COSI ON WHEELS
A Midwest school tradition since 1982, COSI On Wheels introduces dynamic science topics to your entire school with a high-energy, 45-minute assembly followed by a day of hands-on activities that enhance science-inquiry skills.

COSI IN THE CLASSROOM
Ideal for up to 30 learners, these 60-minute workshops use hands-on experiments and science-based tasks to teach students to solve a challenge, taking science lessons to a new level.

AFTERSCHOOL WORKSHOPS
 Designed to complement afterschool programs, these hands-on workshops use inquiry-based learning to explore science and generate excitement among the learners.

SCHOOL AND COMMUNITY CAMPS
As a partner of local school and community camps, the Center offers the excitement of Camp COSI to neighborhoods throughout Central Ohio.

SCIENCE SPOT
Featuring colorful hands-on kiosks, Science Spot traveling exhibitions provide perfect pop-up opportunities for students to play, explore, and learn science together at any school or community event.
Early Childhood Education

EARLY CHILDHOOD EDUCATION OUTREACH
Early Childhood Outreach programs engage preschool through first-grade learners in hands-on science exploration with developmentally appropriate themes and interactive experiments that connect to children’s literature.

LITTLE KIDSPACE®
Young children can safely climb, slide, build, splash, imagine, and pretend in little kidspace at COSI. Designed by early childhood education experts, little kidspace promotes learning in a colorful and engaging atmosphere for little hands and growing minds.
